

Remote Video Inspections

Purpose:

Our office will be conducting Remote Video Inspections (RVI) when feasible.

RVI's will be conducted for the following, but not limited to:

- All re-inspections
- Inspections involving the interior of any currently occupied home
- Electrical service changes
- HVAC changeouts
- Water Heater changeouts
- Insulation
- Brick ties
- House wrap

How to request the RVI:

- Contact Danny Oliver 229-302-1854 between 8am – 4pm. Leave message if unavailable and you will receive a prompt response. For emergency after hours inspections, leave a message and mark as urgent. You will be contacted shortly.
- RVI's will be scheduled in 20 min increments from 8:20-11:40 and 1:00-3:40

How to conduct the RVI:

- Be on site at the appointed time
- Inspection must begin at mailbox, exterior of building, or other approved landmark that distinguishes the site
- Have any necessary tools on hand that may be required

Other Info:

An RVI IS considered a physical inspection. If at any time, the inspector feels that they cannot properly inspect through video, the inspection will be terminated and an on-site inspection will be required.

Please ensure that jobsite noise is minimized in order to properly communicate through the RVI process.
